

HOMEPAGE REDESIGN

Every two weeks

- Create updated Homepage every 2 weeks.
- Analyse Google Analytics data on Homepage performance in order to make right updates and see what is performing well and what can be changed.
- Find right assets in order to present trading products in the best layout combination
- Process the best user journey

Overall page looks minimalistic and clean, also with the focus on the products.

Make design full screen, however make next sections visible, so audience is aware of it being scrollable

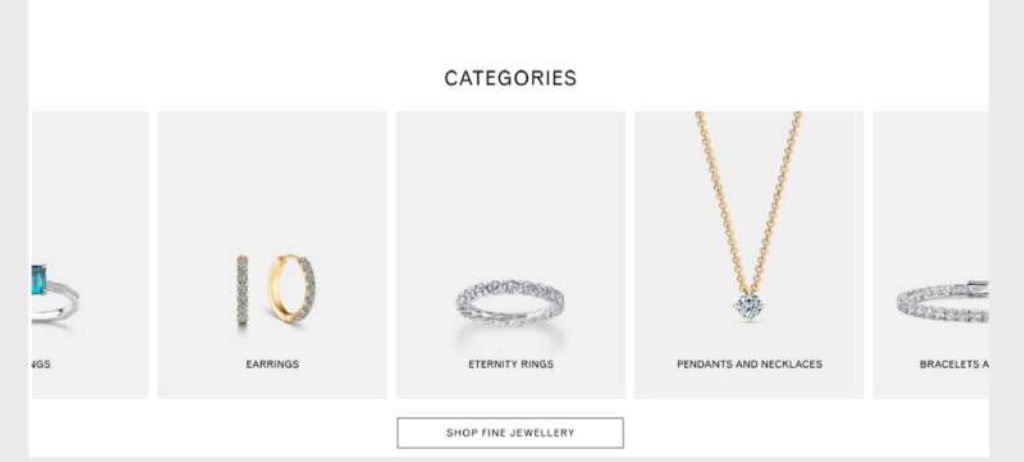

New ring designs are featured in the carousel product listing. All are presented in the same design as in the PLP page, which associates with the step before they proceed to PDP page, with the details of the products.

Create something unique and be a part of the making.
 #CaptureTheFeeling with personal fine jewellery
[FIND OUT MORE](#)

Additional navigation section has made other categories more accessible and also a way to promote products that are less reachable in the traditional navigation

RJ RESPONSIBLE JEWELLERY COUNCIL
 Vashi is a certified member of Responsible Jewellery Council (RJC), the global membership and standards body for responsible jewellery, which tracks the entire supply chain from the mine to retail.

GIFT GUIDE REDESIGN

3 weeks

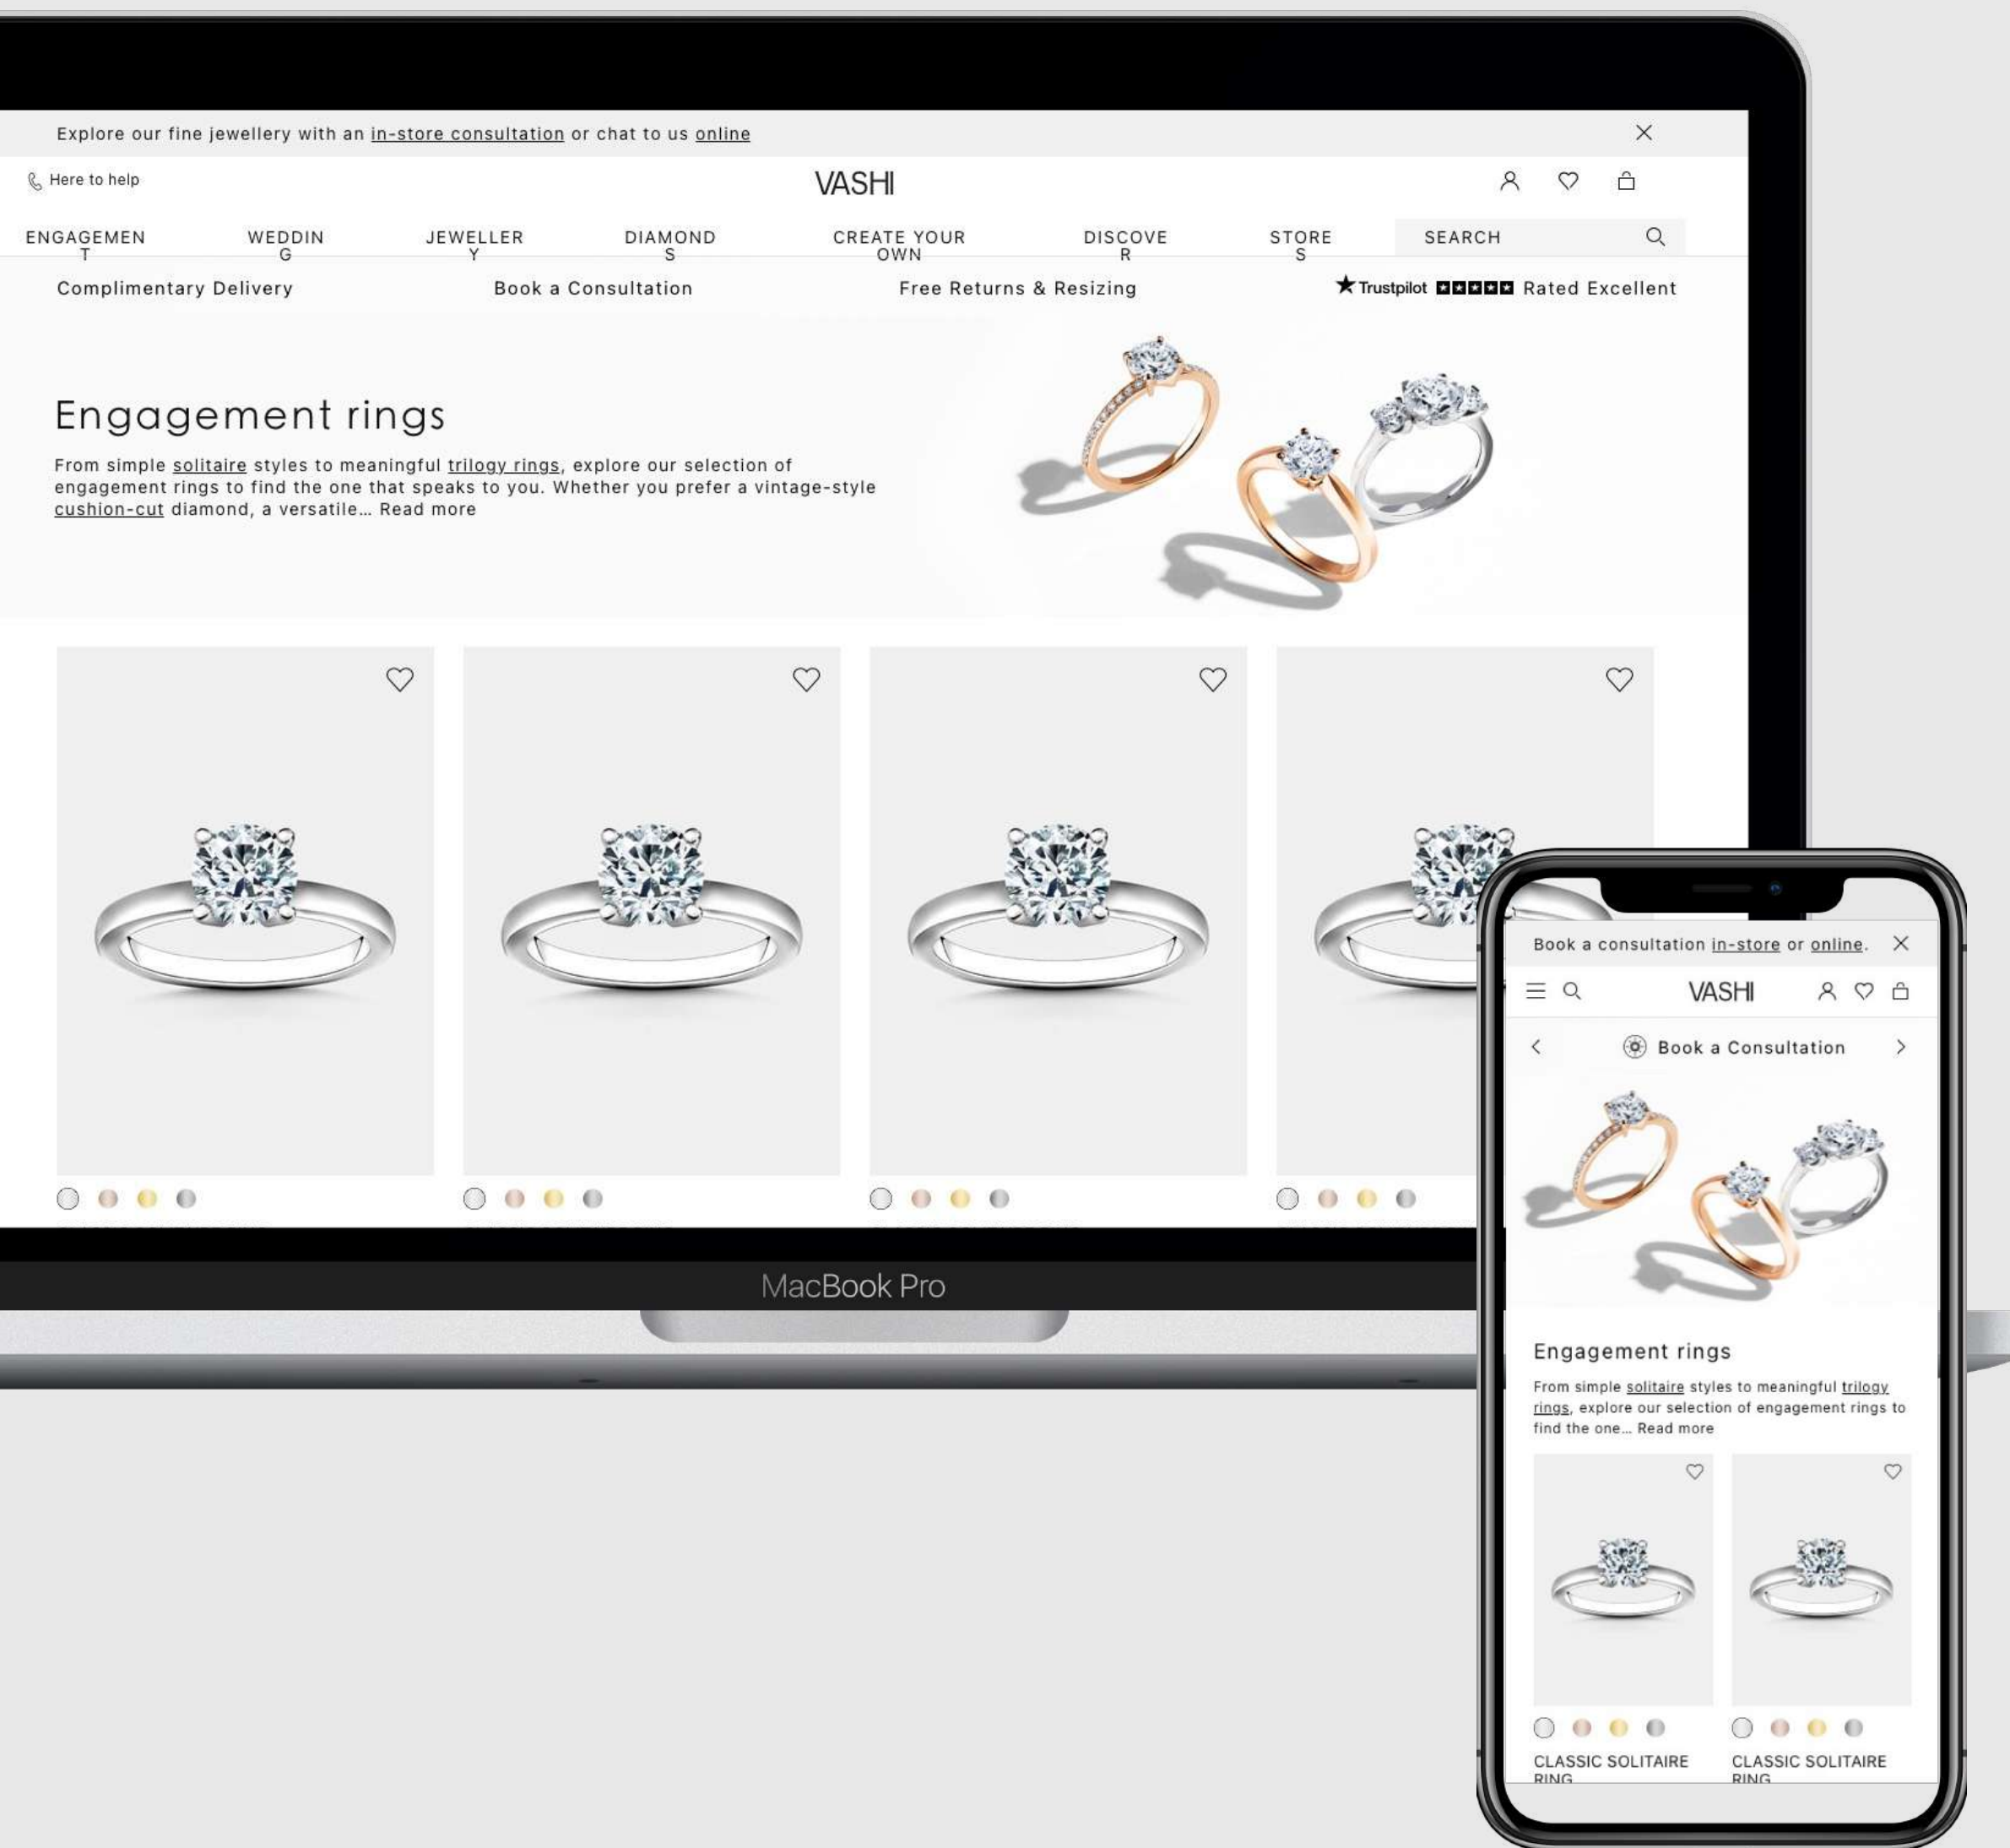

- Redesign gift guide page for higher engagement
- Analyse Google Analytics data on GG page performance
- Research assets from the present campaigns in order to fit overall goal and feel of the page
- Analyse the best user experience for easier product search

Featured or new product focused

Colour separation by sections for content separation and soft transition

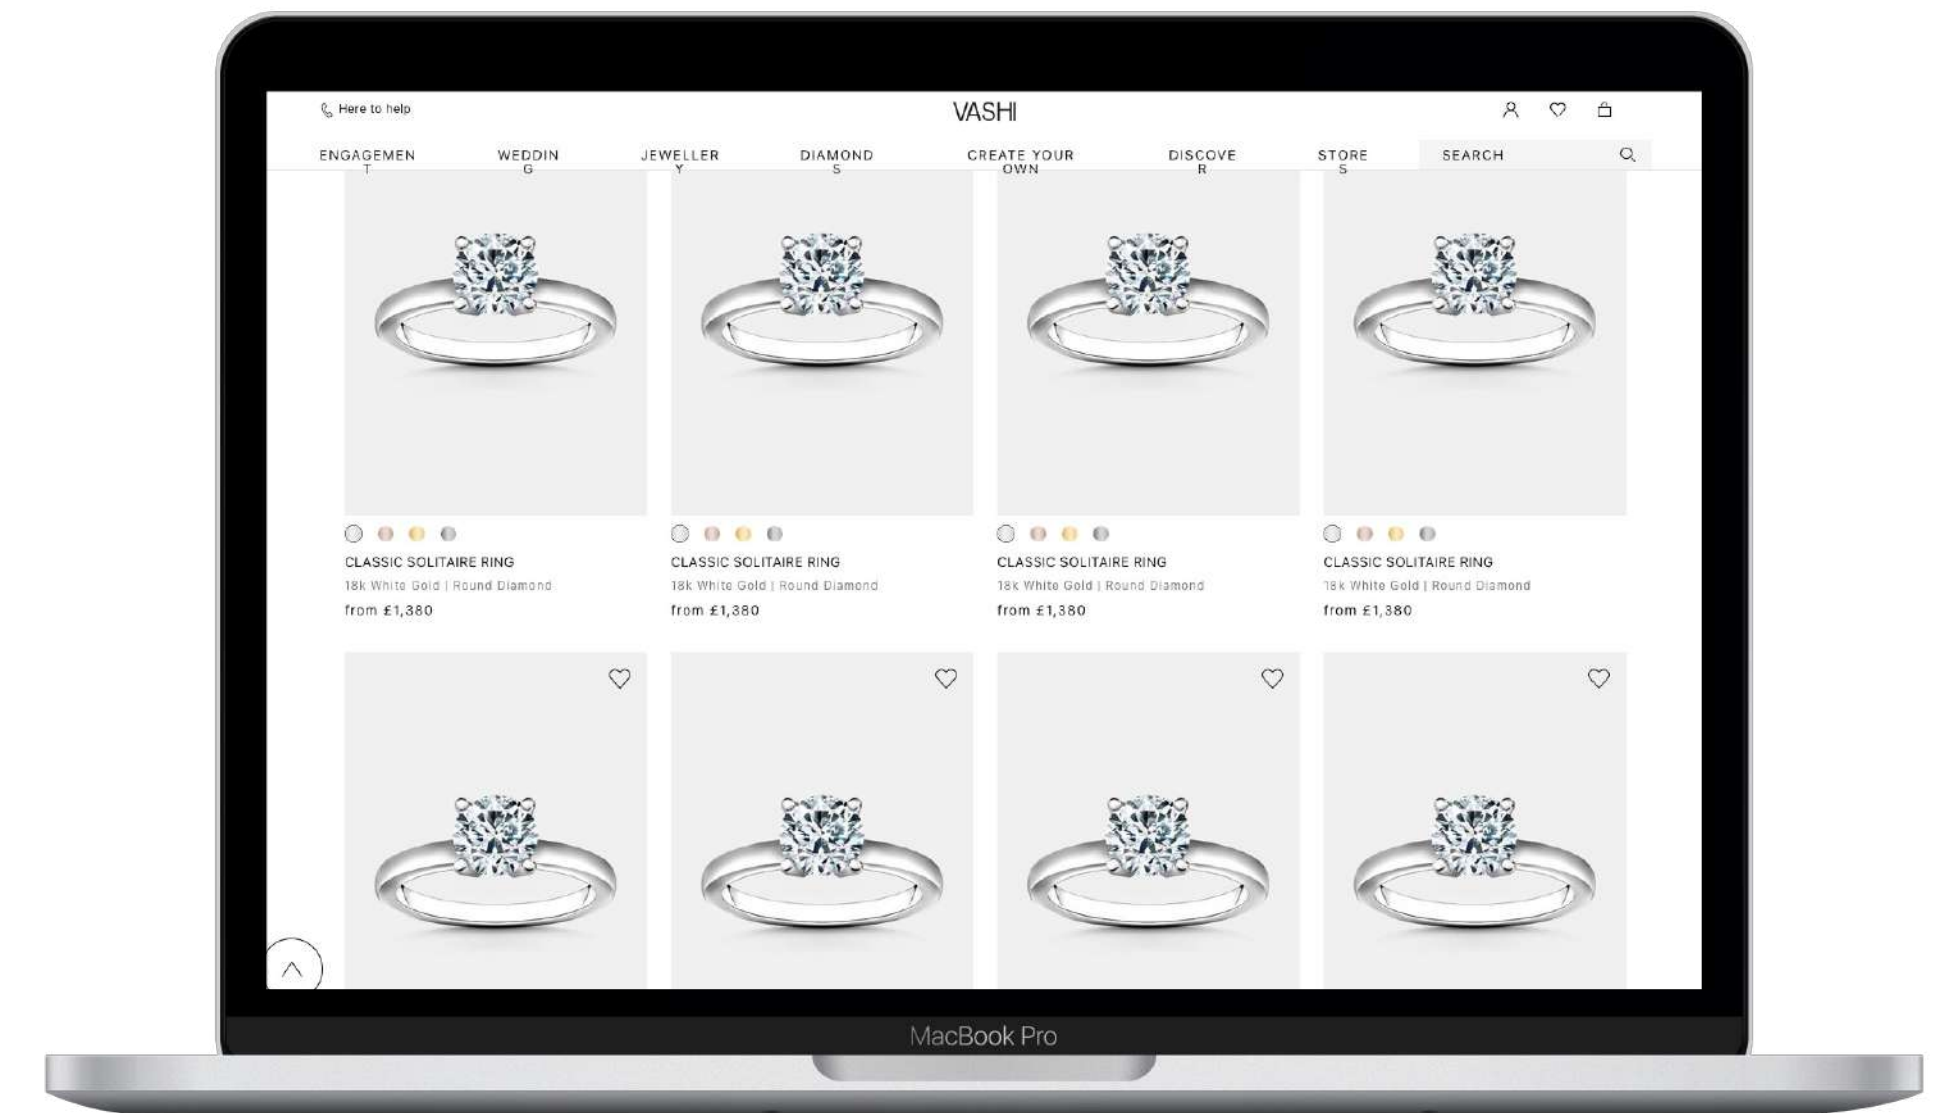

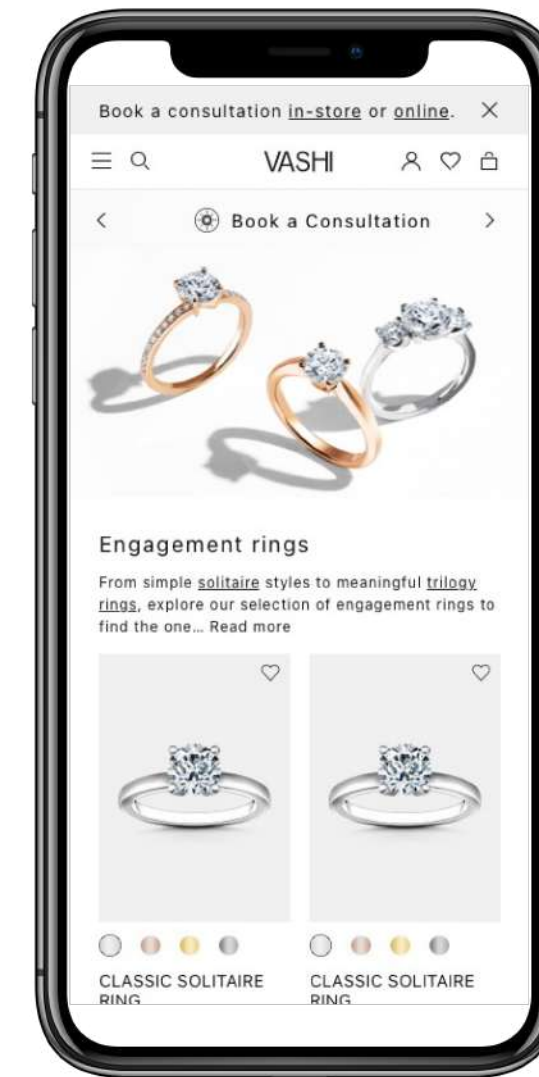

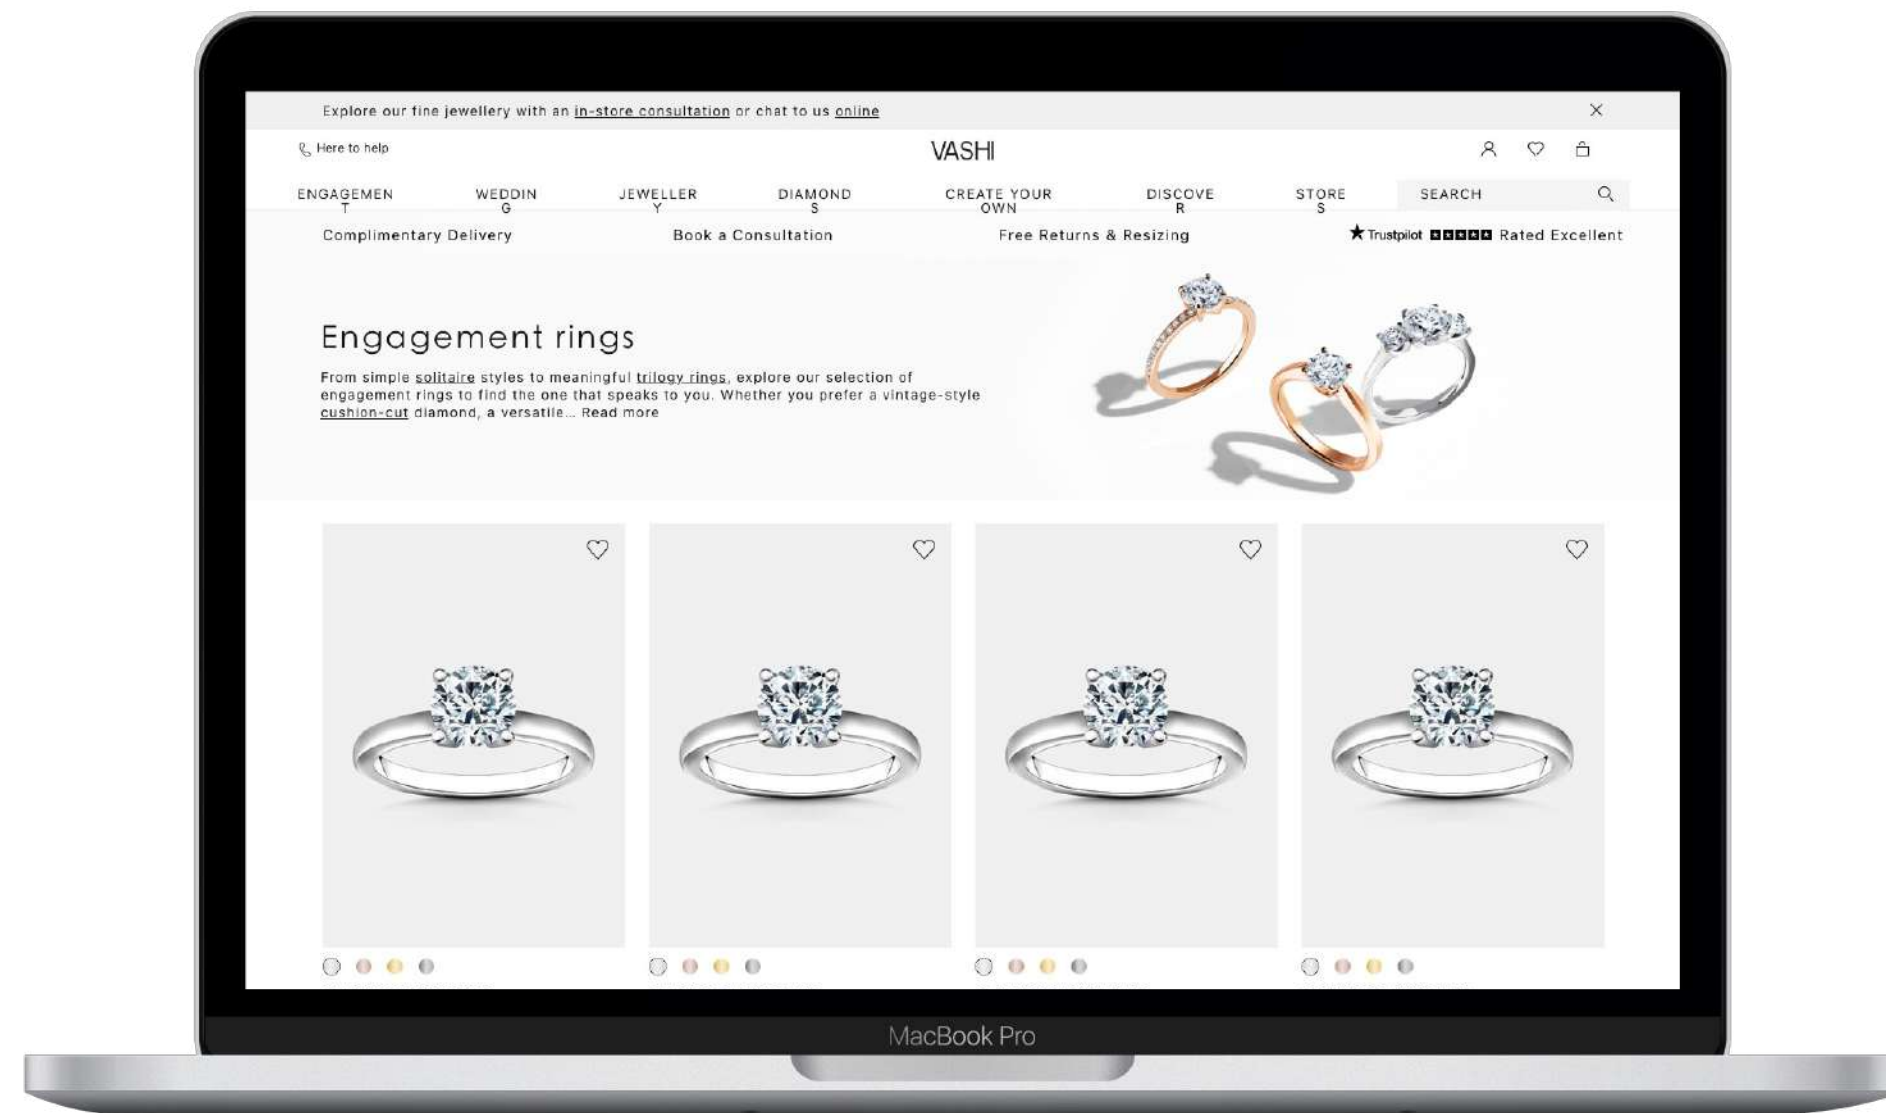

Transparent asset for information focus, however creation of visual transition through falling objects without affecting page load time

PLP & PDP REDESIGN

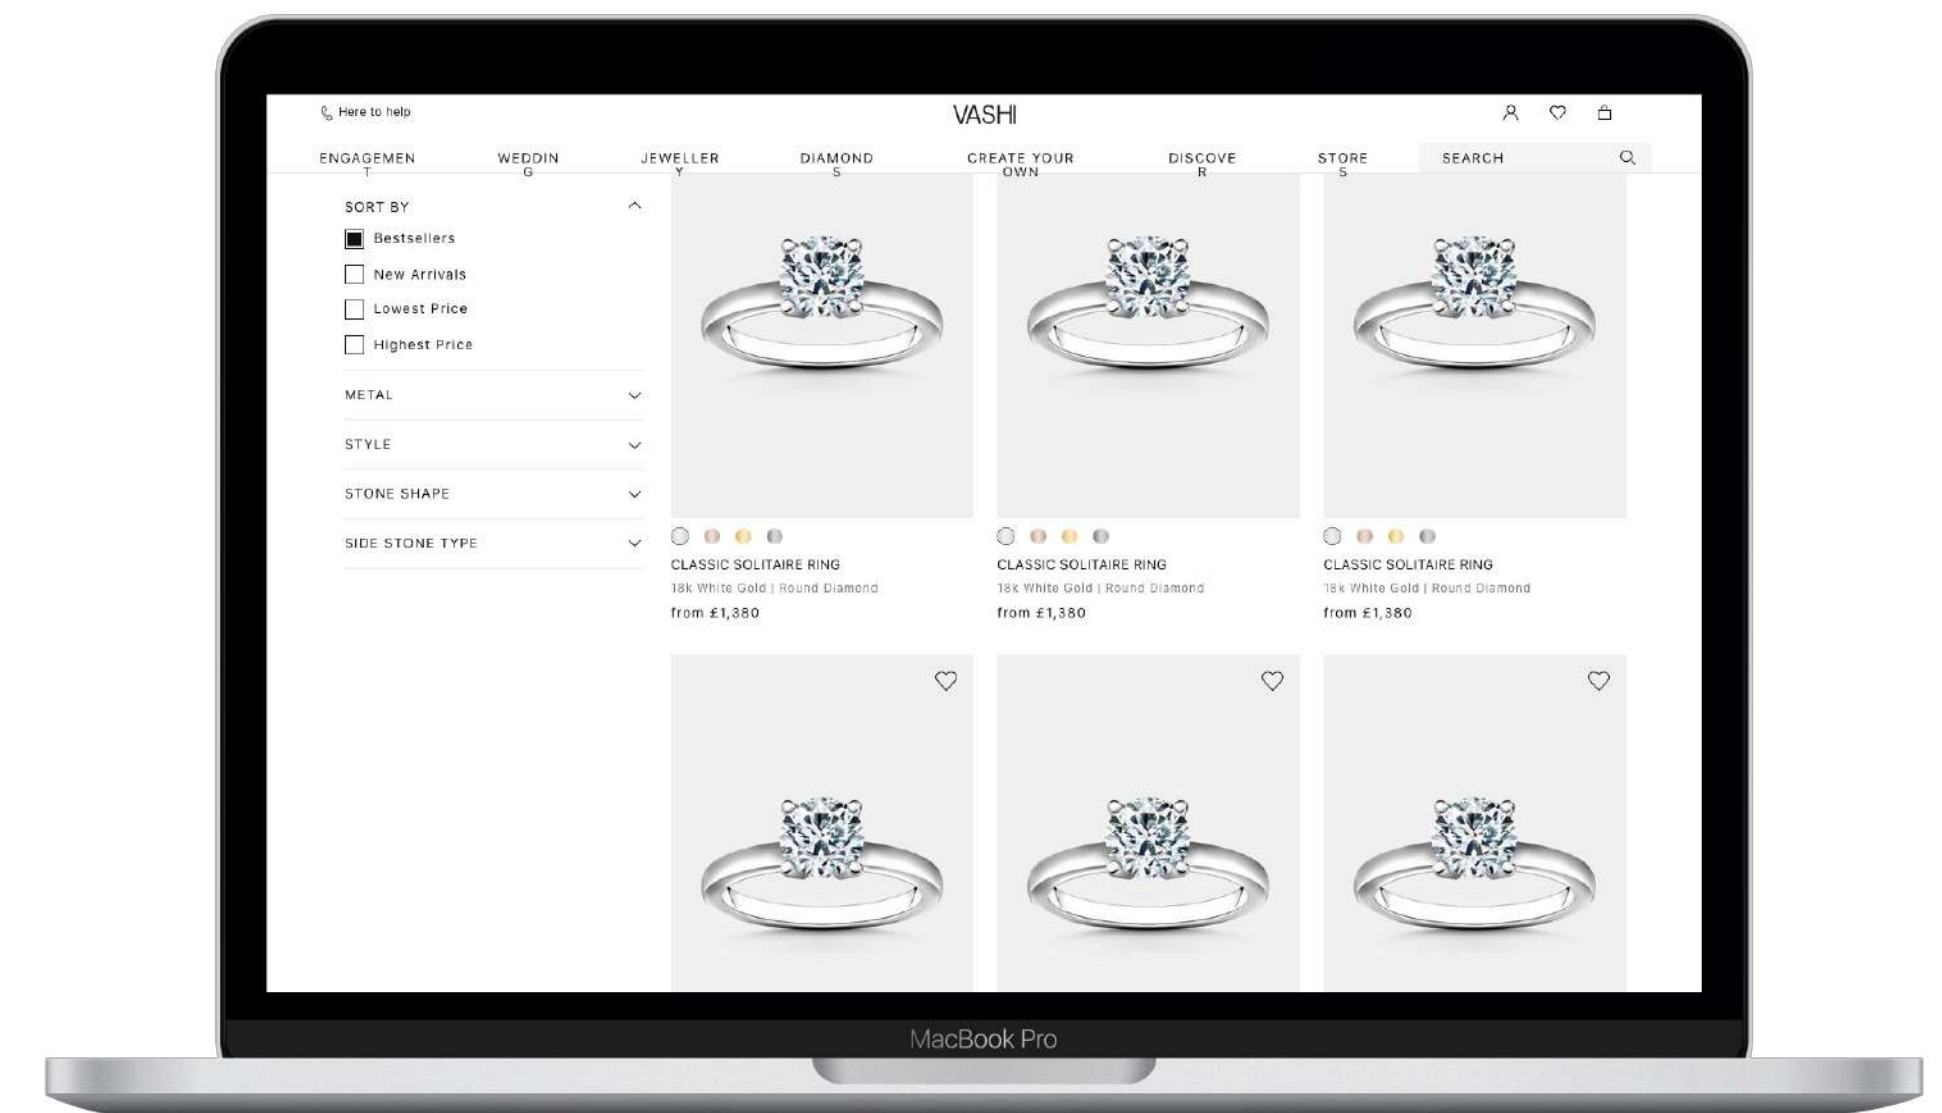

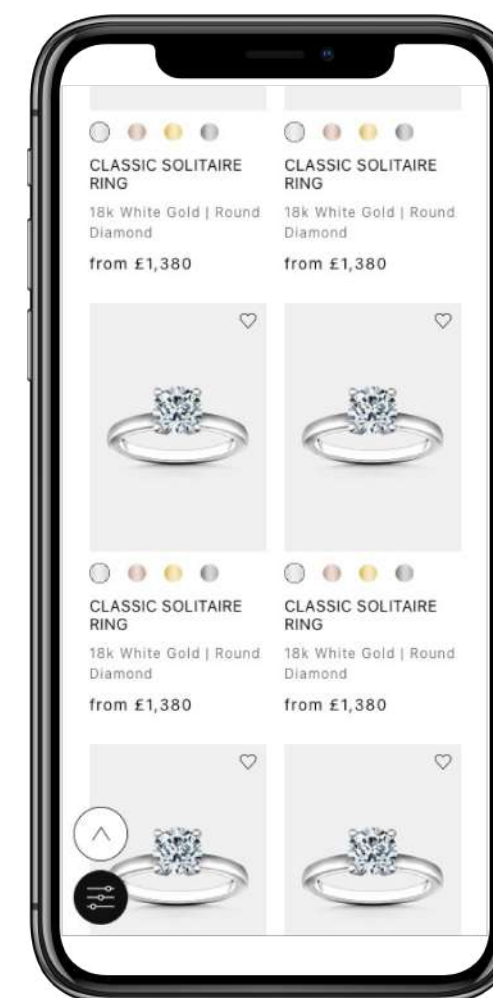

4 weeks

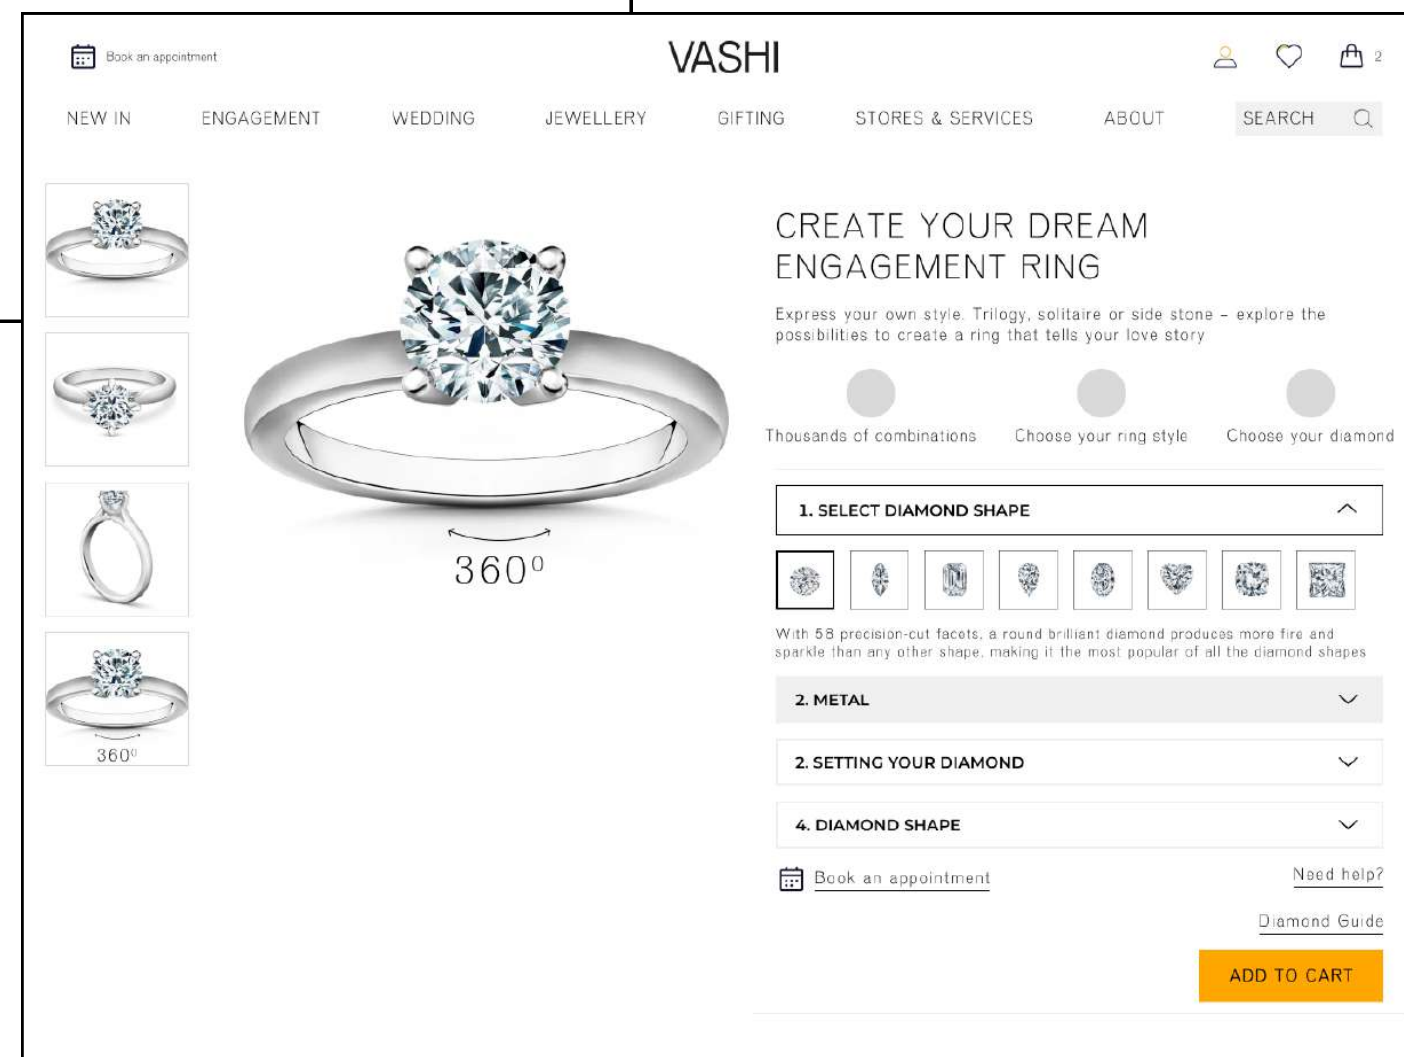

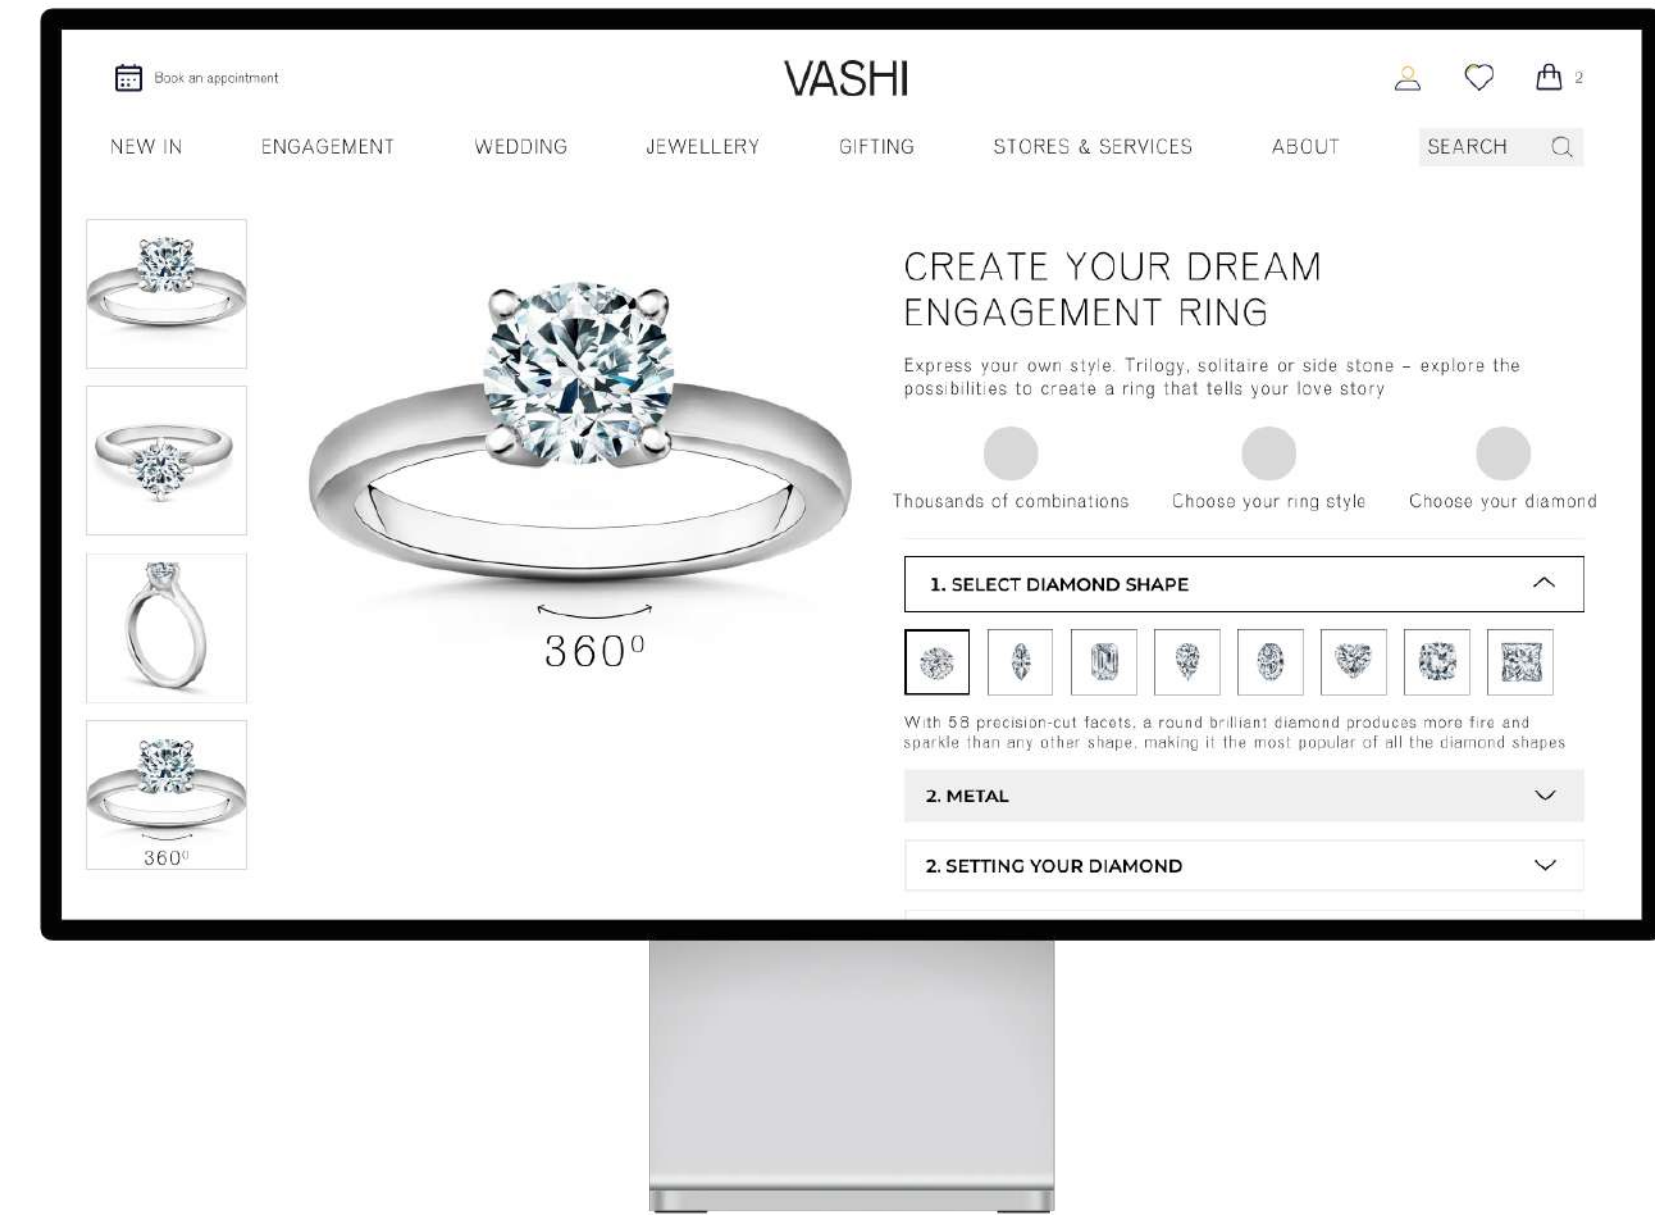

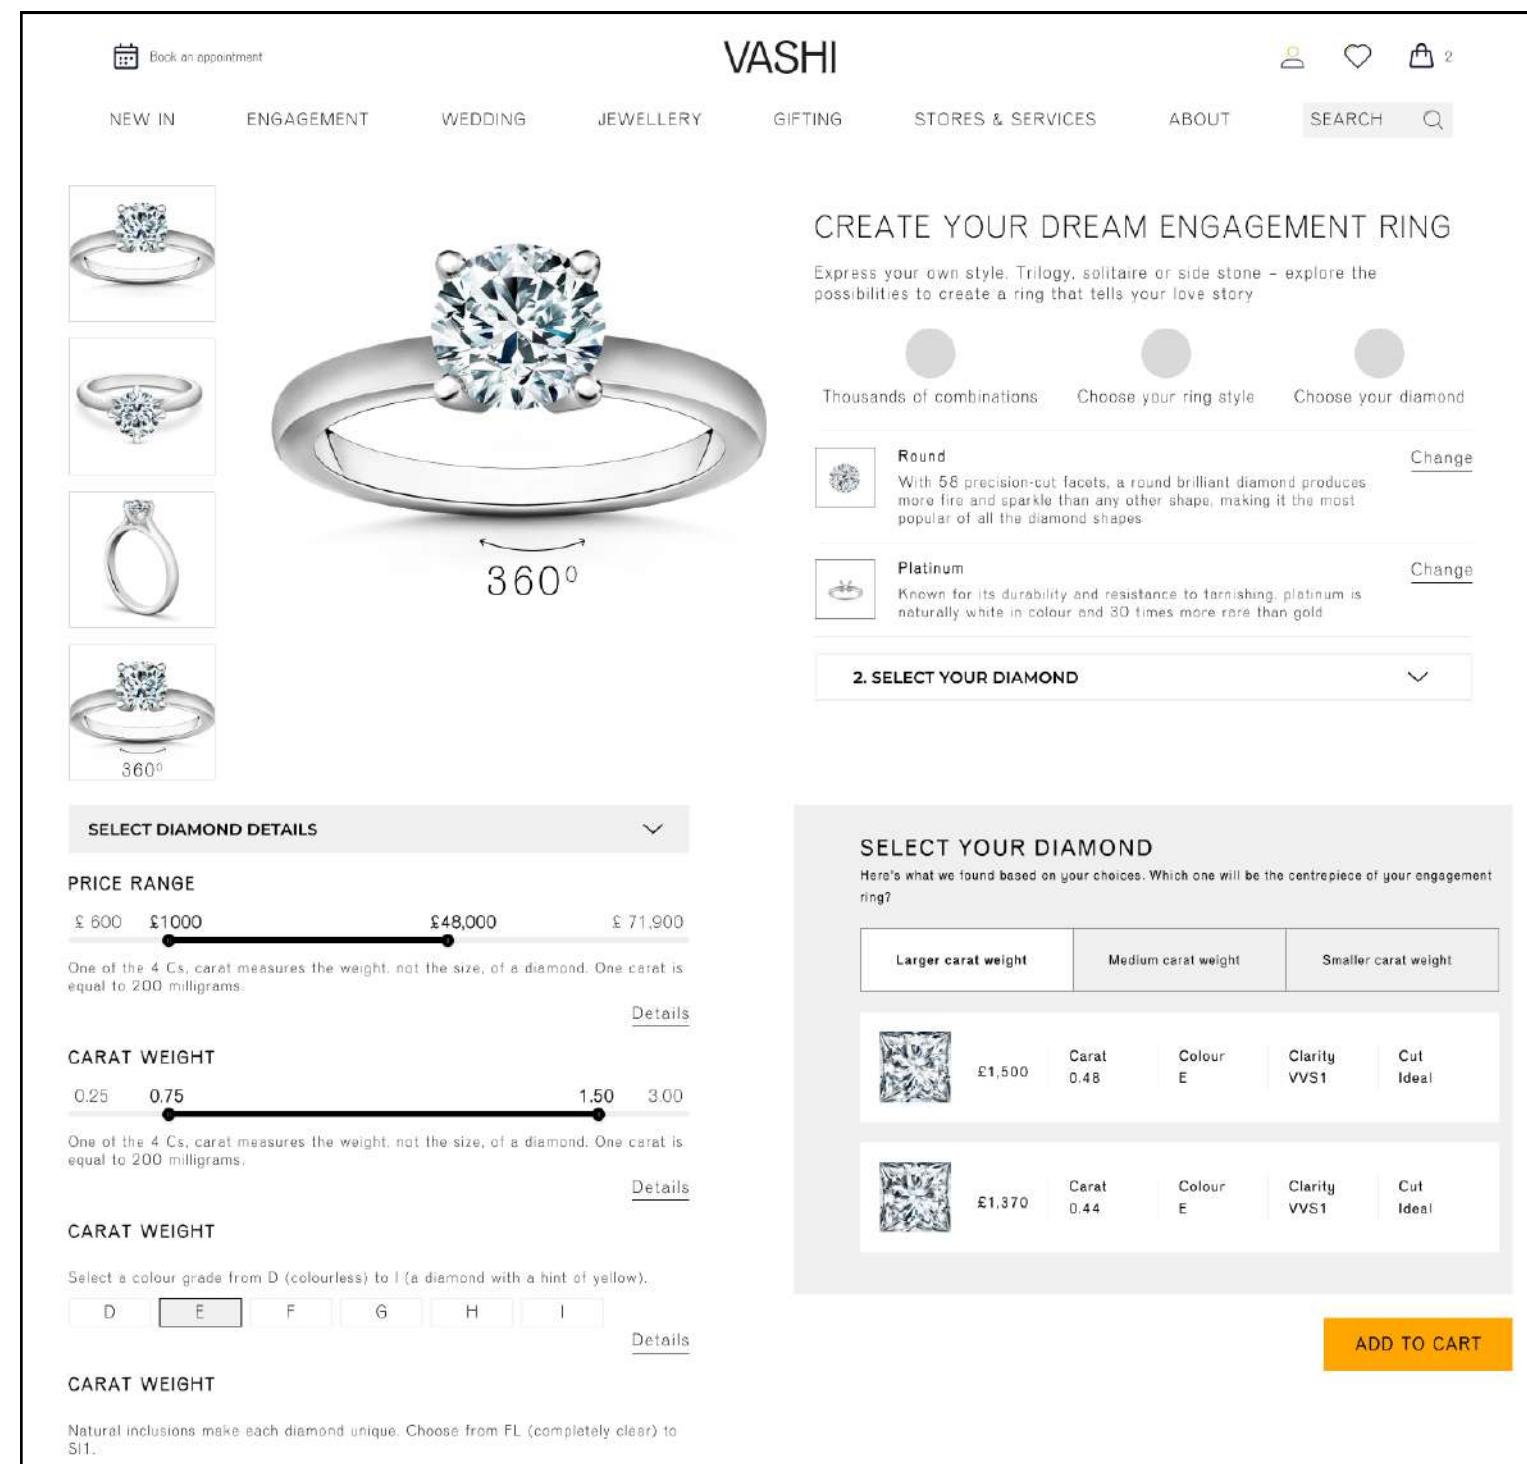

- Redesign PLP and PDP pages for better accessibility and better user flow
- Use UX research, made through interview method
- Research on micro-animation possibilities within Magento ecom platform
- Provide the best presentation of the products and accessible description

PLP

- Provide most space for the product imagery
- Give information and choices of customisation under each product
- Make follow up filter and sorting options throughout the page without taking much space (mobile friendly option)
- Make as much products visible as possible
- Provide introduction to each page for users get aware of where they are on the website and can get used to the website structure easier

PDP and CUSTOMISATION

- Provide options for customisation on the same page as product description
- Make it as accessible as possible through sections and separators
- 360° overview of the product on zoom option
- Drop don sections for easy return and option overview
